

GARMIN® Mount Installation Instructions (K13-520-[color])

K13-520 GARMIN FIXED STEM MOUNT

Description:

The K-EDGE GARMIN Fixed Stem Mount is designed for installation of a GARMIN Edge® or GARMIN Forerunner® computer onto a 1-1/8" Steerer Tube stacked above the stem.

Compatibility:

The K13-520 GARMIN Fixed Stem Mount is compatible with all GARMIN Edge® 200, 500, 510, 800, and 810 computers. It is also compatible with the GARMIN Forerunner® 310XT and 910XT (with 'quick-release kit' purchased separately from GARMIN) computers utilizing the same mounting system. NOTE: The GARMIN Forerunner® 910XT prevents the addition of a spacer on top of the K13-520 due to interference issues – it is recommended that spacer be installed below the K13-520.

STEM RECOMMENDATIONS:

Stem Angle: 0 to Negative-Degree

Warnings:

These instructions are generalized to accommodate a wide range of setups for a bike. If your setup does not match what is being described, take extra care in the process of your setup and contact K-EDGE Technical Support if you have any questions.

Improper installation of any K-EDGE product or use outside of its design intentions could lead not only to damaging the bike and related components but could also cause personal injury to the rider.

Parts Included:

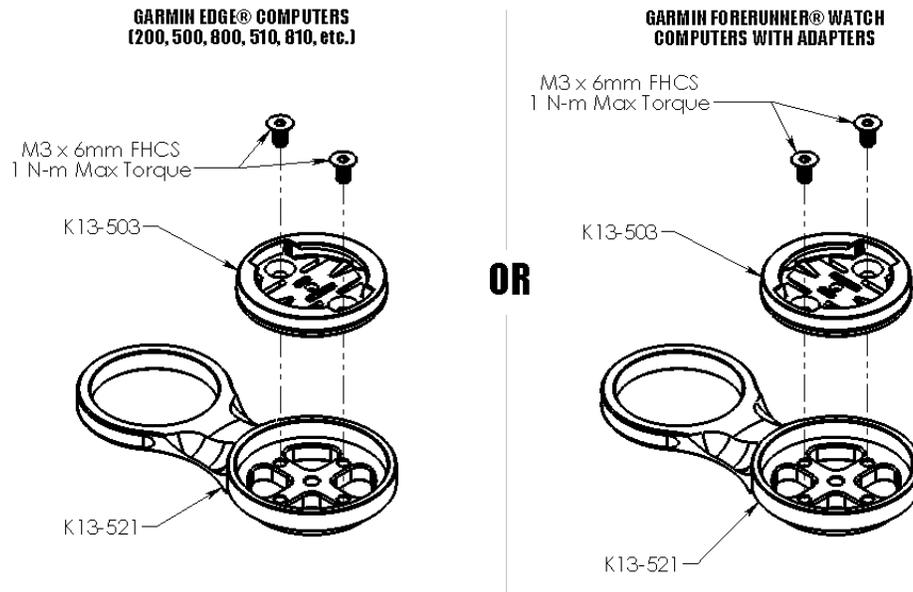

- K13-520
 - ✓ 1x K-EDGE GARMIN Fixed Stem Mount
 - ✓ 2x M3 x 6 mm (Blue Thread Lock applied)

WARNING: IT IS STRONGLY RECOMMENDED THAT YOU PERIODICALLY CHECK ALL BOLTS FOR PROPER TORQUE!!!

Tools/Items Required:

- ✓ Metric Allen Set (5/6 mm for the top cap bolt and 2 mm for the insert bolts)
- ✓ Torque wrench
- ✓ **GARMIN Forerunner® Quick Release Kit (required for Forerunner® 310XT and 910XT owners)**

Mount Installation:

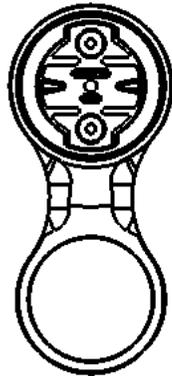

1. Ensure the stem and handlebars are installed, aligned, and torqued according to manufacturer's recommendations for the headset.
2. Remove the top cap:
 - IF A SPACER IS PRESENT ABOVE THE STEM, replace the spacer with the K13-520.
 - IF NO SPACER IS PRESENT ABOVE THE STEM, visually confirm adequate bolt thread length for the addition of a 5mm thickness of the mount.
3. Install the mount on top of the stem.
4. Install, but do not fully tighten, the top cap.
5. Set the mount to your desired position
6. Carefully tighten the top cap bolt according to manufacturer's recommendations for the headset.
7. IF you will be using a GARMIN Forerunner® 310XT and 910XT please proceed to "Insert Adjustment", otherwise installation is complete.

WARNING: IT IS STRONGLY RECOMMENDED THAT YOU PERIODICALLY CHECK ALL BOLTS FOR PROPER TORQUE!!!

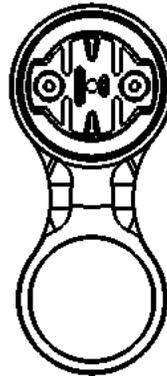

NOTE: The K13-520 is factory assembled for immediate use with GARMIN Edge® computers without any adjustment necessary, **IF** you intend to use the K13-520 with a GARMIN Forerunner® 310XT and 910XT computer, please follow the steps below to adjust the insert (K13-503) to properly accept GARMIN Forerunner® computers.

Insert Adjustment:

GARMIN EDGE® COMPUTERS
(200, 500, 800, 510, 810, etc.)

GARMIN FORERUNNER® WATCH
COMPUTERS WITH ADAPTERS

OR

1. Remove the 2x M3 x 6mm Flat Head Screws holding the K13-503.
2. Reposition K13-503 (see diagram above).
3. Reinstall, but do not fully tighten, the 2x M3 x 6mm Flat Head Screws.
4. Carefully torque the 2x M3 x 6mm Flat Head Screws to a Max of 1 N-m.

Caution: Do not over-torque the M3 x 6mm Flat Head screws.

Note: A small amount of thread lock has been applied to the M3 x 6mm bolt at the factory, it is recommended that an additional amount be added if this bolt were to be adjusted multiple times.

WARNING: IT IS STRONGLY RECOMMENDED THAT YOU PERIODICALLY CHECK ALL BOLTS FOR PROPER TORQUE!!!

Troubleshooting:

- My mount hits the stem during installation.
 - A spacer may be needed below the mount to clear the stem.
- My computer (Forerunner® 910XT) hits the top cap installation and removal.
 - It is recommended that you do not install/stack any spacers above the mount.
- There is a little play even when my computer is installed onto the mount with a positive click.
 - With the computer installed, visually check for movement of the K13-503 from the openings underneath the mount. If movement is detected slightly increase the torque of the 2x M3 x 6mm Flat Head Screws (1 N-m Max).
- The mount rotates about the steerer tube when I install my computer.
 - Check that the proper amount of torque is applied to the top cap bolt.

Support/Contact:

If problem(s) still persist after troubleshooting, please contact K-EDGE Support for further assistance at info@K-EDGE.com immediately. Please be sure to include your full name, phone number, and K-EDGE product purchased.
